Springs

# 1010 Brake Cleaner

High performance assembly - brake cleaner

## Product info

Highly effective cleaning agent that is used in a variety of purposes. Due to pure acetone it is very strong in its capabilities and does not leave any residue. The packaging is designed in a manner that allows all of the content to be used, leaving the container completely empty afterwards.

- / No cloths and brushes required,
- / propellant in the container is sufficient to use all of the content with no leftovers,
- / high cleaning effect, contains high share of pure acetone,
- / does not leave any residue,
- / not corrosive and does not harm rubber or plastic parts.

High pressure application

## How to use?

Prior to disassembly of the parts, use the Brake cleaner to clean the surface. After a few seconds the spray will evaporate, leaving clean surface that does not need to be brushed or wiped. After all the parts are disassembled, clean the individual parts with the spray, thus cleaning the difficult to reach areas of additional debris.

**Usage possibilities: cleaning rotors, cylinders, clutches, bolts, screws, springs...**
