Using Silco UV LED
at 10 cm

EASY APPLICATION

7150 M15 UV Surfacer

UV Curable Primer Filler

Drying time*

Using a 400 Watt
UV-lamp

5 min + 3 min to heat up the lamp

Using Silco
UV LED at 10 cm

4 - 7 min

Direct sunlight

30 - 45 min

Flash-off

5 - 10 min

Potlife

Unlimited

*Indicative times subject to thinner type/application/wet film thickness/environment ...

How to

APPLICATION

Light half coat followed by full closed coat with 5 minute flash-off can be used for priming. This way you achieve up to 80 microns of dry film with 15 minutes sanding time. Two normal full coats (with 5-10 minutes flash-off) and up to 120 microns will result in 15 minute sanding time.

For further and updated information please refer to the TDS published on www.silco-automotive.com.

Info

PRODUCT

The product is dried with UV light and does not contain isocyanates. Top-quality acrylic primer-filler with exceptionally fast drying time suitable for fast repair process of small and larger surfaces. Possible to apply to bare metal. The surface is smooth.
