

90.300 UniMix 2K DTM 80 % Glossy Binder

Ver.: 2021 - 12

Description

90.300 UniMix 2K DTM 80 % Glossy Binder is used to produce polyurethane coatings based on PU 2K technology, which can be applied direct onto substrates and combine the features of a primer as well as the quality of the topcoat.

Features

- gloss levels of approximately 80 to 85 % (60° angle)
- one layer system directly on metal
- high thickness: up to 300 μm of wet film
- can be applied with airless, air-assisted airless, conventional or HVLP methods
- good adhesion on various substrates (bare steel, aluminium, galvanised steel, fibre reinforced plastic)
- high coverage power in combination with UniMix tinting system

Substrate preparation

<u>Substrate</u>	Sanding	<u>Degreasing</u>
Cast Iron:	P80 - 120 (dry) SA2 $\frac{1}{2}$ sandblasting	All surfaces need to be
Bare steel :	P80 - 120 (dry) or shot blast	thouroughly cleaned, dryed and degreased with
Phosphated steel:	Matting paste + matting cloth	appropriate anti-silicone
Galvanized steel:	Matting paste + matting cloth	cleaner.
Light alloys:	Matting paste + matting cloth	
Fiber reinforced plastic:	P240 (dry)	

The product shows direct adhesion on metals without a previous primer application. Because of the variety of substrates is always better to perform some preliminary tests before final application.

It is recommended to use appropriate primer (epoxy, etch, etc.) to optimize adhesion and corrosion protection on aluminium and galvanized steel surfaces.

In case of sandblasting the surface, paint job must be done immediatelly after sand blasting.

UniMix DTM coating is possible to overcoat with the same DTM coating in 15 minutes from first application or 6h after first application. When the material is completelly dry (24h) the surface needs to

be sandend.

Drying

 Dust dry (20 °C/68 °F):
 20 – 30 min

 Touch dry (20 °C/68 °F):
 2 – 4 h

 Totally dry (20 °C/68 °F):
 24 h

Totally dry (60 °C/140 °F): 30 min **Potlife (20 °C/68 °F):** 2 h

Dry film thickness: $60 - 100 \mu m$

Higher thickness can be achieved with additional

coats. This may extend the drying time.
