Tehnical Data Sheet

90.655 UniMix Orientation Additive

Ver.: 2022 - 01

Description

90.655 Unimix Orientation Additive is an additive for mixed topcoats with a higher proportion of aluminum pigments (eg. RAL 9006). By using the additive, we improve the distribution and orientation of aluminum crystals, thus eliminating the cloudiness of the painted surface.

Features

- elimination of cloudiness of the painted surface
- easy dosing in mixed topcoat
- does not affect the basic properties of the coating

Use of additive

90.655 Orientation Additive is suitable for use in combination with the following Unimix binders: 90.300; 90.310; 90.320; 90.330; 90.510; 90.520; 90.530; 90.900; 90.910; 90.920; 90.930

Surface preparation

All surfaces must be properly prepared according to the instructions for preparing the surface for the mixed topcoat used.

Mixing ratio

Add 10 - 15 % in mixed topcoat. For the mixing ratio of mixed topcoat, hardener and thinner, see the technical data sheet for each mixed topcoat or binder.

Health and safety

For Health, Safety and Environmental instructions please refer to relevant Safety Data Sheets and labels on the cans. Storage conditions should also be considered.
