# 9004 Clear Finish

1K glossy acrylic clear coat

## Drying time

Dust dry (20°C/68°F)	10–15 min
Touch dry (20°C/68°F)	60–90 min
Polish dry (20°C/68°F)	6 h
Fully dry (20°C/68°F)	24 h
<b>Flash-off</b> 20°C/68°F	3–5 min

\*Indicative times subject to hardener and thinner type/application/environment...

## How to use?

Shake can thoroughly until the mixing balls move freely. Surfaces to be treated must be thoroughly dry. Do not apply this product on the surface coated with synthetic enamels. After spraying, turn the can upside down and spray until the valve is clean. It is strongly recommended that ready to use product is applied at above 15°C/59°F.

For further and updated information please refer to the TDS published on [www.silco.si](http://www.silco.si).
