Technical Data Sheet

9584 Prefill DME

Ver.: 2021-1

ICO°

AUTOMOTIVE

Description

Pre-fill for solvent based coatings with 275 ml of propellant, solvent and additives with capacity of 100 ml of paint.

Features & Benefits

Spray can pre-filled with suitable propellant and thinner for filling with paint.

With special aerosol head for paint application.

Substrate preparation

Are must be clean, dry and free of grease and dust.

Application data

	Mixing ratio The product is ready for use! Amount of propellant: 275 ml of propellant Suitable for 100 ml of paint			
	ApplicationShake the aerosol before use for 2 minutes.Aerosol pressure: 3,5 bar at 20 °C/68 °F.Spraying distance: 15 – 20 cmSpray several thin coats at the recommended distance.Important: the thinner the paint coat is applied, the better is the temperature-resistanceand adhesion. No primer needed. The best results is achieved at the application on baremetal! It is strongly recommended that ready for use product is applied at a temperaturehigher than 15 °C/59 °F.Slight colour differences may occur.After spraying turn the can upside down and spray until the valve is clean.			
	Drying In the case of forced drying drying time depends on used quality of paint. Recoatable with 1K or 2K clear coats.
